

Lauren Hasson is the Founder of DevelopHer, a career development platform for tech women by tech women, and a software engineer at a prominent Bay Area fintech company where she builds their apps and is a principal member of their information security team. Her work has been featured in Apple keynotes, she was one of 100 top innovators invited to attend the UK G8 Innovation Summit to present to the United Nation's technology council, and she's won multiple, high-profile hackathons including SXSW (x2), PBS POV, and UnGrounded. She holds a degree from Duke where she completed a triple major with honors in electrical engineering, computer science, and economics in just four years.

Dr. Karisa Peer is the founder of Mother Squad, Inc, which offers live group video chats that provide new moms with support and education from experts and other moms. Her multifaceted career spans non-profit program management, grant writing, community outreach, qualitative research, freelance writing, as well as over a decade of teaching from preschool to university levels. In all of her work, Dr. Peer has focused on challenging the status quo for families from disenfranchised communities. Dr. Peer is a UCLA graduate with a Ph.D. in Education. She received a Master of Arts degree in Teaching from the University of San Francisco and a Bachelor of Arts degree in Sociology/Anthropology and Spanish from Middlebury College in Vermont.

Adrienne Weir co-founded Medolac in 2009 with her serial entrepreneur mother, Elena Medo, after she spent more than a decade in healthcare. Having previously developed a national network of human milk banks, Adrienne has strong market instincts with a focus on innovations that have a global market reach. She is driven to improve access and expand use of lifesaving human milk products. This mother-daughter duo are the innovation leaders for neonatal nutrition, and the global human milk market.
